Windows - Currently tested on Windows XP SP3 and Windows 10. Graphics - Currently tested on hardware that can render about 2500+ polygons on screen at 60 FPS. The graphics card should be capable of displaying 50% more polygons than the game is currently using on screen (i.e. If the game renders 4000 polygons, your graphics card should be capable of displaying 20000 polygons). For optimal performance, your graphics card should be capable of displaying the game at a resolution of 1920x1080 (and setting anti-aliasing to high) and using hardware acceleration.
