The day I got my iPhone I was desperate, I did some research on the internet and I found a good friend of mine that use to be a professional locksmith. I remember in the end of the conversation he showed me his box and the tool he use to unlock the phone. Decent item overall. However, some parts of the box broke after only a few months. The box itself is of good quality and has enough space in it. I can fit up to 5 phones in it and other small items. It holds up but will not hold much weight. The wires on the bottom of the box is too narrow but the top part of the box is wide enough so no problem there. Overall I would give it a 7.5/10 overall. Decent enough item but do not want to invest more money in just yet. The Vygis box is the best to use with an android phone. This is an excellent tool that made phone unlocking so easy. Unfortunately it is very expensive. Have been using the vygis box for over a year now and it still works very well. The only down side is the size. As you are limited to four phones total in the box I don't think this will be a good tool for hauling a lot of keys. This box is awesome!. OMNIA Repair Tool; Polar Box; Spiderman Box; Super Doctor Box . Its a new genre of boxes, which we are loving and its here to stay.. Boxes, while at first glance being just a way to keep multiple phones and their keys safe,.. Amazon has the Polarbox Infinity Box & Happy Box for \$49.99 with Free. We all like to show off to our friends and family by unlocking their phone or telling them the cool features we can't live without.. box, and USB Analyzer are all the tools needed to unlock any phone without a soldering iron. i have seen this box in a blog that really makes all differnt phones taste sweet, and it is really worth it to get a box if you wanna get the best iphone jailbreak keygen tool. 3 days ago my zte z1 pro got stolen, my phone was locked.. Now I got phone unlocking done and one iphone unlock toolbox was able to unlock my phone without going through all the hassle. I gave the box a 7 because it has a top that holds 4 phones, but those phones are identical and top is too narrow to 570a42141b
