The Palettes window lets you customize the interface of the program, and the Work Space window lists your drawings, toolbars, and drawings that you are working on. The main menu of AutoCAD Classic features a single tab called Graphics, followed by a toolbar of 14 icons for most of the tool commands. There are two more tabs on the menu, Sheet Setup and Toolbar Setup, which are for creating and manipulating sheets and toolbars. AutoCAD Classic displays items that you select with the mouse, using double-click to open them. You can also use the ZOOM and VIEW commands to zoom in on an item or to see more detail. You can drag objects to different locations, and you can rotate, resize, move, and copy objects. You can even align objects by dragging them to an anchor point.
