YouTube Step 9. Click the OK button. Now open the application. The front-facing camera on the iPhone X has never been the best. Its optical image stabilization is often inconsistent and unpredictable, and when trying to take photos during an argument or when it's windy, using the X's camera can turn your phone into an unintentional weapon. But those are just minor annoyances in an otherwise well-thought-out phone. According to a Bloomberg report, the iPhone X may also be the first iPhone to launch with a 3D touch-capable rear-facing camera as well. The current iPhone 7 Plus is the most capable iPhone we've ever seen, and it sports three rear-facing cameras and one selfie camera, all of which make it a powerhouse for taking photos. It has the same

12MP front-facing camera as the iPhone X and now also a 3D face-recognition camera at the back that can capture depth information, so you can swap the photo out. The information will be stored in a specialized chip and can be e79caf774b
