The real me is getting lonely... Sometimes I feel like floating through an endless labyrinth. If you're going to take the chance, why don't you come along with me? The real me is getting lonely... Sometimes I feel like floating through an endless labyrinth. If you're going to take the chance, why don't you come along with me? Through this vast, dark labyrinth I'll protect you, We'll go together~ Let's go, jump! Through this vast, dark labyrinth I'll protect you, We'll go together~ Let's go, jump! Hinata Ikari Creation Writer ★ Introduction "Ikari-sensei..." A solitary voice is the only sound you hear. A fragile figure so small it's hard to believe it could speak with such a loud voice hovers before you. Its eyes are simply black orbs, with no distinction. Small fingers play with the air and its body trembles as it waits for you to look. "It's a labyrinth, isn't it?" "A labyrinth..." A voice so low and weak it could easily be mistaken for the sound of wind. You look on in disbelief, but in the same instant you have a sudden recollection. 「Let's go, jump!」 In that instant you quickly move to turn off the alarm. "Thank you for saving my life." The voice fills your heart with warmth and love. You see that the ringing of the alarm has been silenced. "Ikari-sensei..." "It's okay, I'm here." Hinata calls out to you. The vase from the entrance of the labyrinth has vanished and a rosy-colored, light materializes in the air to fill the room. A swirl of light that passes through a yellow crystal loses its color and glows a bright red. Its infinite form takes on a wholly different personality, sparkling with the sharpness of a blade of light and lightly dancing. Like a spirit, it approaches you. 「Get in here, Hinata-kun.」 "Wait…" 「Come on, get in!」 You awkwardly step into the tiny space and enter the v

In Angel's Theory, you are an angel lost on Earth. A cataclysmic event has destroyed everything and left you alone and in desperate need of a place to stay. As the only available shelter you crash on a human's house. After getting acquainted with the inhabitant, you have nowhere else to go. Will your quest for a home turn out for the worst or the best? How will it all turn out? Gameplay: Angel's Theory is a story driven atmospheric action/adventure game, which tells the story through visual storytelling. It is about exploring the human psyche. What goes on behind the scenes and inside the dark rooms of each of our minds. Inspired by films such as Eternal Sunshine of the Spotless Mind, Amelie, Apatow, Fight Club, Ratatouille, Welcome to Marwen, the story is told visually and cinematically through poetic wordplays and artistic symbols. The game will take up to about 10 hours to complete. Mac users with an Intel Pro-series card should use the iMac Pro. Windows users with a recent video card should use Windows 10. Windows 7 users with a recent video card should use Windows 10. Super Trench Attack 2 is a truly unique, top-notch adventure! You're in for a treat, because this game will not be tamed by the likes of the cookie-cutter bean-counters out there. There won't be any quests you have to play through to advance. There won't be any trivial collectables or points to be earned on your way to the final "hooray!" (or should I say "YARGH"). Game Mechanics The game is both turn-based and action-based. So there's no random events (like scavenging for supplies or finding the perfect sniper position), your actions matter! You can carry out the best strategic planning out there, but if you don't shoot, move and use the available weapons wisely, the game will just want to "die". To do that, you'll have to work your way through the complex levels, make the right decisions, and get the better of your enemies. Strategic Planning The tactical part of the game is very important. Here's the basic gameplay: Your mission is to get to H.Q. with the stolen black army plans. The black army's C.O. (Commander of Operation) is going to be the evil Helmut. There are four possible course of actions you can take: - Head to the coast and attempt to escape; - Shoot the enemies that get in your way, jump over the cliffs, and escape on the beach; - Go to the mountains and escape on the glacier; - Get the fighting started, shoot everything that moves, and get the hell out of there. Which way should you take? The tactical part is just like the very famous game, Advance Wars. Gun Guided Assault Besides strategy, there's a different action based part to the game too. There is no RTS (real-time strategy) part to the game. So, if you want to push something into a computer console and check your stats, you can't. There's a gun guided assault mechanic included. This will be explained to you in the tutorial, but at this point, I just want to make sure you're fine with it, so no worries! Special Thanks There are a couple of people that had a hand in this title. First of all, thank you to Team Trenches for allowing me to help you out! They are responsible for this title

Q: How to add a specific text after $(this)? I need to write a piece of javascript after the html with these classes "Title" and "Holder". That makes var titleText = $(this).text(); and gives this result at the console : * * * * * *. That means that there are 4 asterisks. I need to add 4 lines with this text, so that they are not printed in the console... Does anybody know a solution to this problem? A: The jQuery object representing the

 element does not have the text() function. Use either.textContent or.html in place of text. See the jQuery API for more information. You will need to code your own function for this, possibly like: function printAsterisks(el) { var allSpans = document.getElementsByTagName('span'); for (var i = 0; i
