Railway Empire is a beautifully crafted strategy game about building, managing and running the railway system of an imaginary European country. Cities & towns need to be built, stations have to be built, trains need to be built, trains need to be built... Key Game Features: - Low tech/high production units, mines & machinery: The game is about building an efficient railway system, by using simple, low-tech units to allow the player to build everything in an efficient way. - Sector Boundaries: Buildings, units & services can be build anywhere on the map. The game uses sectors as the main component of the gameplay - a border system that keeps gameplay as short & simple as possible while maintaining a global gameplay impact. - Players can build all transport units, including trains. This includes fast steam trains, slow steam trains and fast diesel trains. This allows for a wide variety of gameplay possibilities. - Double-sided board - offer two different board configurations, train strength based on the number of track segments and trains can be built anywhere on the map. - Can be played with two (or more) players on the same PC: With Railway Empire and its DLCs you can create your own game, and have a multiplayer strategy game. - Transport Units / Wealth Intensifier: You can use double-sided board with two different track types, and the players can use a wealth intensifier - a modular system in which players can increase their train strength by using a certain number of "wealth cells" to get more stations, different train strength or to build more trains. - Helpful Tutorial System: The game has a tutorial system with all of the information you need to get you started and to learn more about the game. - Multi-level buildings: Buildings can be build on a different level, and the higher the level of the building, the more complexes can be built inside it. - Expanded Logistics: Players can manage their logistics. Owned stations make available fast transportation between them, and if a player have enough money can buy it. - Planned Wreck: You can plan your own wrecks, and may then choose which parts to keep for yourself and which to sell. This also effects the price you receive for any goods you sell later. - Custom Map: You can decide the final size of the map, the location of start and endpoints and the starting resources of the game. - Hardcore - Pick & Choose: As the main resource used in the game is the

Old England is on the brink of catastrophe. The railway system is breaking down and the Irish are stirring. Not good for England, certainly, but the circumstances have driven some of the oldest and staunchest English families towards their former colony, Australia. If England is to be saved, it must be done by the descendants of the railway builders of England. Old family houses, famous and infamous, are being torn down to make way for the new railway line. But something else has moved into the area, something far more dangerous than the railway company's plans. The supernatural. The land is alive with monsters, phantoms and spectres. They're neither friend nor foe, but something all together new. As the old, old families begin to be torn apart, the Railway Empire will be built by people with new family loyalties and new family secrets.
